

OSCAR TRÍAS

Senior Product Manager | Consumer Lending and Daily Banking | Fintech Mexico

Mexico City, Mexico | (+52) 55 3025 0995 | otriasm@gmail.com | linkedin.com/in/oscartriasm | <https://otriasm.github.io/>

I started my career in UX, and now I create product. That's why I look at every flow from four angles: business, data, technology, and UX. Right now I lead Daily Banking at Actinver — onboarding, savings, and lending — as one customer story, not three separate products. I always start with data and always work as part of a team; I see myself more as a product builder than a feature manager. Here is what has come out of that approach:

KEY RESULTS

- +15% in the digital credit portfolio: I redesigned account opening into a 24-hour flow on a funnel with almost no tracking in place, building the signal and the risk rules while we launched, not before.
- I connected Crédito Simple (our personal loan) with the credit bureau and worked with Risk/Prevention and Operations on internal underwriting; in parallel, we built acquisition campaigns with Growth (push and email) to win back drop-offs.
- I cut onboarding drop-off by 7 points, raised the first-funding rate to 6%, and reduced funding time from two weeks to 7 days, together with Growth, Marketing, and CX.
- I designed Daily Banking as one story: onboarding feeds savings behavior in the interest-bearing account, and that informs how we originate credit — not three separate products.

EXPERIENCE

SR. Product Manager | Grupo Financiero Actinver · 2026 – Present · Mexico City, Hybrid

Daily Banking: digital credit origination, credit card, interest-bearing account, and onboarding (N4) — four lines running in parallel with PO, UX/UI, architecture, and engineering teams.

- I built internal partnerships with Growth, CX, Marketing, Operations, and Legal to get a full view of the segment, instead of optimizing each line on its own.
- I redesigned the Crédito Simple application into a 24-hour flow and connected it to the credit bureau and internal underwriting, working closely with Risk/Prevention and Engineering to launch fast without losing control of risk.
- I lead the data analysis between first and second credit card funding, using AI (Claude/ChatGPT) to speed up analysis and define the acquisition strategy.
- I designed the interest-bearing account as a tiered product tied to user savings behavior, connecting onboarding, savings, and credit in one funnel.
- I put cross-functional governance in place (DOR, DoD, RACI) to run four lines in parallel, prioritizing with RICE and validating with A/B testing.

Global Product Manager | Santander Mexico · 2023 – 2025 · Mexico City

Mobile and web banking at scale: 8M+ users across KYC, onboarding, home, payments, and 2FA. Matrix coordination with product teams in 8 countries.

- I redesigned the app journeys together with regional teams, unifying the experience across 8 countries and adapting it for the Mexican consumer — the same kind of cross-geography coordination I still use today.
- I was the bridge between business and technology: I translated local market needs into requirements for the global engineering team.
- I improved team efficiency by 15% through better agile delivery (DOR, DoD, QA, UAT) and raised NPS by 2 points with A/B testing and data-based decisions.

Product Owner | Raven, a Virtus company · 2021 – 2023 · Santiago, Chile

End-to-end launch of Now.Bank, Mexico's first neobank, 850k+ users — leading the Mexico team remotely from Chile.

- I took the bill-payment module from launch to scale (+3.5% usage) and cut onboarding churn by 5% by improving activation.
- I defined and prioritized the onboarding and bill-payment roadmap through discovery, and set the acceptance criteria for Card Control, Activation, Payments, and 2FA using JTBD frameworks.

UX Strategy Consultant | NTT DATA · 2018 – 2021 · Mexico City

- I did user research, journey mapping, and data-driven discovery for digital financial products — that's where my user-centered way of thinking about product started.

SKILLS

Credit and business

Digital origination · Credit bureau · Scoring / underwriting · Credit card · Interest-bearing account · Partnerships with Growth, Marketing, CX, and Risk · Acquisition and distribution (push, email)

Product, engineering, and AI

Roadmap and backlog · RICE, OKR · Discovery · A/B testing · User research · JTBD · Partnership with engineering · Claude/ChatGPT for data analysis and prototyping

Speed and collaboration

Shipping with incomplete information · Cross-geography matrix coordination (8 countries at Santander, remote leadership from Chile at Raven)

Education and tools

BA in Business Administration (UVM) · Digital Marketing Specialization (ITESM) · Product Manager (Colectivo 23) · UX Strategy (Ironhack) · Jira, Confluence, Figma, Miro, SQL · Native Spanish, English B1

Out of Office

Mountain Biking · Trail Running · Endurance Racing · Mountain Navigate · Trekking · **My Wife and my Dog**
